

With Hate Crimes Law, Obama Triumphs Over Judeo-Christian Morality

MEDIA ADVISORY, Oct. 29 /Christian Newswire/ -- True to his campaign promises to advance the radical homosexual agenda, President Barack Obama celebrated his latest legislative victory over Judeo-Christian morality yesterday in a public signing ceremony of the hate crimes law, which was passed earlier this week after being repeatedly rejected by Congress over the past decade.

Dr. Rick Scarborough of Vision America Action declared: "This is a sad day for America. While a small minority of homosexual activists are celebrating, thousands of pastors, priests and rabbis are lamenting their loss of First Amendment freedoms. I for one refuse to bow before this unjust and unconstitutional law, and I intend to continue to preach the whole counsel of God as revealed in Scripture."

Scarborough observed: "It's interesting that while the signing ceremony was public, the bill was passed in the dead of night, hidden away in a totally unrelated appropriations bill to fund the war on terror. The reason is quite clear: Most Americans understand that this legislation is wrong for our nation by granting protected-minority status to a lifestyle choice which, many of us feel, is reprehensible. At the same time, it criminalizes Christianity, attacks religious freedom and stifles free speech."

"Because this law punishes thoughts as well as deeds, for the first time in American jurisprudence, Lady Justice will have to lift her blindfold and try look into the minds of men to assess their motivation."

Scarborough charged: "Increasingly, the Obama administration acts like the San Francisco city council. In his speech before the Human Rights Campaign, our president said he looked forward to the day when the 'relationships between two men or two women are just as real and admirable as a relationship between a man and a woman.' His administration is staffed by the likes of Safe Schools Czar Kevin Jennings, who admitted that he once advised a 15-year-old boy to continue to have sex with a man he met in a public restroom. By attacking the Defense of Marriage Act, the president has announced his intention to legally de-construct marriage in the United States."

Scarborough concluded: "At Vision America Action, we are as determined to uphold Biblical truth as the president is to advance the homosexual agenda."
